

## LEED for Commercial Interiors (LEED-CI)

### RBM Noor can provide 4 (or 5) LEED points

LEED for Commercial Interiors offers building owners, tenants, designer and contractors a guideline for creating more efficient, healthier interior spaces that promote comfort and productivity. Points are distributed across 7 major credit categories, where 2 of the categories are relevant for RBM's products.

RBM Noor contributes to green building projects as follow:

#### Materials and Resources (MR)

##### MR 2: Construction Waste Management

*LEED intent:* To divert construction and demolition debris from disposal in landfills and incineration facilities. Redirect recyclable recovered resources back to the manufacturing process and reusable material to appropriate sites.

*Result:* RBM Noor is made from more than 90% recyclable materials. All plastic parts are marked for easy identification and sorting. The only materials that are not recyclable are foam and textiles.

*LEED points:* Gives 2 points (out of 2).

##### MR 4: Recycled Content

*LEED intent:* To increase demand for building products that incorporate recycled content materials, thereby reducing impacts resulting from extraction and processing of virgin materials.

*Result:* The RBM Noor contains more than 10% post consumer recycled materials.

*LEED points:* Gives 1 points (out of 2)

##### MR 5: Regional Materials

*LEED intent:* To increase demand for product that are assembled within the region, thereby supporting the regional economy and reducing the environmental impact resulting from transportation.

*Result:* RBM products are assembled in Nassjo, Sweden..

*LEED points:* Can give 1 point (out of 2) if the building project is within 500 miles/800 km from Nassjo.

#### Indoor Environmental Quality (IEQ)

##### IEQ 4.5: Low-Emitting Materials

*LEED intent:* To reduce the quantity of indoor air contaminants that are odorous, irritating and harmful to the comfort and well-being of installers and occupants.

*Result:* RBM Noor with standard textiles is designed to meet the GREENGUARD requirements.

*LEED points:* Gives 1 point (out of 1)

*Our products can help a client to score points within the groups MR and IEQ. A practical problem for the client, however, is to weigh the chair's part of the complete interior. If, for example, a table also meets the requirement, it would be wrong to accumulate 2 points from the chair and 2 points from the table and thus score 4.*
